INSTEON BRIDGE SET UP AND DISCOVERY ///

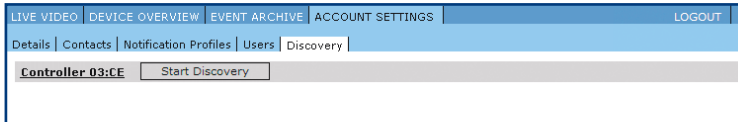

Please use the following directions to install & configure your **AT&T Remote Monitor Insteon Bridge**.

NOTE: A **Model 2412S Power Line Modem** is required.

1. Connect the RJ45 style connector from the AT&T Remote Monitor Insteon Bridge to the Insteon Model 2412S Power Line Modem.

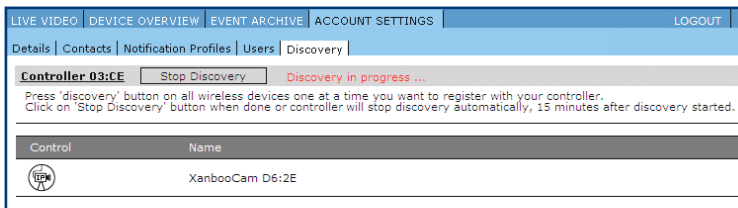

2. Log into your remote account and go to the **Discovery** page of the **Account Settings** section. Press the **'START DISCOVERY'** button on the **Discovery** page.

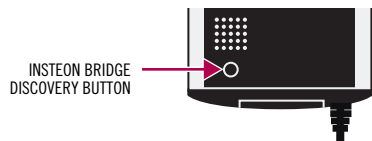

START DISCOVERY

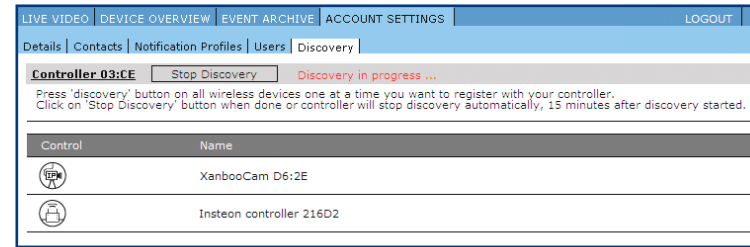

3. Once the Discovery process has begun, press the **Discovery** button on the Insteon Bridge.

DISCOVERY IN PROGRESS

3. Once the Discovery process has finished for the Insteon Bridge it will appear on the list of your devices on the **Discovery** page.

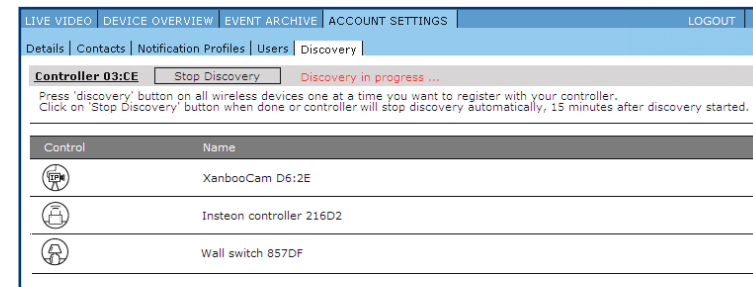

INSTEON BRIDGE DISCOVERED

INSTEON DEVICE DISCOVERY ///

1. While you are in **Discovery** mode in your account the light will be flashing LED indicator on the side of the Insteon Power Line Module.

NOTE: The Insteon Power Line Mode will automatically be set into **Discovery** mode by your **XG1000 Controller**. There is no need to push any buttons on the Insteon Power Line Module.

2. Hold down the button on the side of the Insteon device you're discovering until the connected light or device flashes twice. At this point the LED indicator on the side of the Insteon Power Line Interface will stop flashing for a moment and then will start blinking once again.
3. The device will then appear on the list of discovered devices on the **Discovery** page of your AT&T Remote Monitor account.
4. When you are finished discovering devices, press **'STOP DISCOVERY'** and click **'DEVICE OVERVIEW'**.

INSTEON DEVICE DISCOVERED

5. At a later date, if you wish to add additional Insteon devices to your system simply log into your remote account and go to the **Discovery** page of the **Account Settings** section; press the **'START DISCOVERY'** on the **Discovery** page and repeat steps 2 & 3 above.
